Enter the world of the *Condylura cristata*, the little-known star-nosed mole. The only mole that thrives in both earth and water, this animal lives in the wetlands of the American Midwest and southeast Canada. In this beautiful picture book, young readers get a mole's-eye view of marsh life, following one star-nosed mole on an expedition through a dark tunnel deep underground and out into a sparkling pond. "This lyrical, read-aloud romance will endear Mole and his underworld to children."--*Publishers Weekly*
