Soft Computing for Hybrid Intelligent Systems (Studies in Computational Intelligence)

Soft Computing for Hybrid Intelligent Systems (Studies in Computational Intelligence)

We describe in this book, new methods and applications of hybrid intelligent systems using soft computing techniques. Soft Computing (SC) consists of several intelligent computing paradigms, including fuzzy logic, neural networks, and evolutionary algorithms, which can be used to produce powerful hybrid intelligent systems. The book is organized in five main parts, which contain a group of papers around a similar subject. The first part consists of papers with the main theme of intelligent control, which are basically papers that use hybrid systems to solve particular problems of control. The second part contains papers with the main theme of pattern recognition, which are basically papers using soft computing techniques for achieving pattern recognition in different applications. The third part contains papers with the themes of intelligent agents and social systems, which are papers that apply the ideas of agents and social behavior to solve real-world problems. The fourth part contains papers that deal with the hardware implementation of intelligent systems for solving particular problems. The fifth part contains papers that deal with modeling, simulation and optimization for real-world applications.

From reader reviews:

Dale Winsett:

Nowadays reading books become more than want or need but also be a life style. This reading practice give you lot of advantages. Associate programs you got of course the knowledge even the information inside the book this improve your knowledge and information. The data you get based on what kind of reserve you read, if you want get more knowledge just go with education and learning books but if you want experience happy read one using theme for entertaining for instance comic or novel. The Soft Computing for Hybrid Intelligent Systems (Studies in Computational Intelligence) is kind of reserve which is giving the reader unpredictable experience.

Ruth Michel:

This book untitled Soft Computing for Hybrid Intelligent Systems (Studies in Computational Intelligence) to be one of several books that best seller in this year, this is because when you read this guide you can get a lot of benefit on it. You will easily to buy this specific book in the book retailer or you can order it by means of online. The publisher of the book sells the e-book too. It makes you easier to read this book, as you can read this book in your Smart phone. So there is no reason to you to past this e-book from your list.

Adrian Johnson:

Reading can called imagination hangout, why? Because if you are reading a book specially book entitled Soft Computing for Hybrid Intelligent Systems (Studies in Computational Intelligence) your mind will drift away trough every dimension, wandering in each aspect that maybe not known for but surely will become your mind friends. Imaging each word written in a guide then become one application form conclusion and explanation that maybe you never get before. The Soft Computing for Hybrid Intelligent Systems (Studies in Computational Intelligence) giving you one more experience more than blown away your brain but also giving you useful data for your better life in this particular era. So now let us teach you the relaxing pattern this is your body and mind will likely be pleased when you are finished looking at it, like winning a game. Do you want to try this extraordinary investing spare time activity?

Kristen Blasingame:

Are you kind of busy person, only have 10 or even 15 minute in your day time to upgrading your mind expertise or thinking skill even analytical thinking? Then you are experiencing problem with the book when compared with can satisfy your small amount of time to read it because this all time you only find book that need more time to be go through. Soft Computing for Hybrid Intelligent Systems (Studies in Computational Intelligence) can be your answer as it can be read by you who have those short spare time problems.
