**Communication Satellite Antennas: System Architecture, Technology, and Evaluation** Robert Dybdal

## **A Practical Approach To Antenna Technology For Communication Satellites**

This authoritative resource discusses antenna technology for communication satellites, addressing both the space and user segments. The book provides a system view of antenna applications, a description of various antenna technologies, and guidance on methodologies for antenna evaluation.

*Communication Satellite Antennas* begins with an overview of the parameters that characterize antennas, and goes on to cover the antenna designs, technologies, and system architectures required for communication satellite systems. Techniques to mitigate interference are covered, and the processes used in the development and characterization of antenna systems are reviewed. Discover how to:

- Adhere to the system parameters used to quantify antenna performance
- Understand the technologies used in wide coverage, earth coverage, narrow coverage, and array antennas
- Work within standard communication satellite system architectures and orbital alternatives
- Address propagation limitations and link performance
- Implement reliable antenna interference mitigation techniques
- Develop space segment antennas, including spot beam, multiple beam, adaptive uplink, active aperture, and point-to-point antennas
- Apply user segment technologies, such as reflector antenna technology, antenna sidelobe control techniques, and adaptive interference cancellation systems
- Evaluate satellite antennas and systems using rigorous methodologies

### **From reader reviews:**

#### **Patricia Welling:**

In this 21st one hundred year, people become competitive in each and every way. By being competitive today, people have to do something to make them survive, being in the middle of often the crowded place and notice by surrounding. One thing that at times many people have underestimated that for a while is reading. Yeah, by reading a publication your ability to survive boost then having chance to remain than other is high. For you who want to start reading any book, we give you that Communication Satellite Antennas: System Architecture, Technology, and Evaluation book as basic and daily reading book. Why, because this book is more than just a book.

#### **Nancy Sobel:**

The book Communication Satellite Antennas: System Architecture, Technology, and Evaluation will bring you to definitely the new experience of reading a new book. The author style to describe the idea is very unique. When you try to find new book to see, this book very appropriate to you. The book Communication Satellite Antennas: System Architecture, Technology, and Evaluation is much recommended to you to see. You can also get the e-book from official web site, so you can easier to read the book.

#### **Teresa Graham:**

Spent a free time and energy to be fun activity to complete! A lot of people spent their sparetime with their family, or their very own friends. Usually they undertaking activity like watching television, planning to beach, or picnic within the park. They actually doing same task every week. Do you feel it? Would you like to something different to fill your current free time/ holiday? Might be reading a book might be option to fill your totally free time/ holiday. The first thing that you will ask may be what kinds of reserve that you should read. If you want to consider look for book, may be the book untitled Communication Satellite Antennas: System Architecture, Technology, and Evaluation can be excellent book to read. May be it could be best activity to you.

#### **Debra Weeks:**

A lot of reserve has printed but it differs. You can get it by net on social media. You can choose the best book for you, science, witty, novel, or whatever through searching from it. It is named of book Communication Satellite Antennas: System Architecture, Technology, and Evaluation. Contain your knowledge by it. Without leaving the printed book, it could possibly add your knowledge and make you happier to read. It is most essential that, you must aware about reserve. It can bring you from one destination to other place.
