Foundations of Neuroeconomic Analysis Paul W. Glimcher

A new academic field, neuroeconomics, has emerged at the border of the social and natural sciences. In *Foundations of Neuroeconomic Analysis*, Paul Glimcher argues that a meaningful interdisciplinary synthesis of the study of human and animal choice is not only desirable, but also well underway, and so it is time to formally develop a foundational approach for the field. He does so by laying the philosophical and empirical groundwork and integrating the theory of choice and valuation with the relevant physical constraints and mechanisms.
