Keeping Mozart in Mind Gordon L. Shaw

The demand for math and science skills in our technology-driven world is at a premium, and yet U.S. students continue to lag behind many other industrialized countries in these areas. This book, based on studies conducted on 8000 elementary school-aged children, proposes that not only is there a relationship between music and math comprehension, but that music can be utilized to heighten higher brain function and improve math skills. The enclosed CD-Rom includes (1) a recording of Allegro con spirito from *Sonata for Two Pianos in D Major (K. 448)*, by Wolfgang Amadeus Mozart, performed by Murray Perahia and Radu Lupu, courtesy of Sony Classical™, and (2) a descriptive interactive version of S.T.A.R.™ (Spatial-Temporal Animation Reasoning) software program. While this book's discussion of the breakthroughs in understanding of spatial-temporal reasoning abilities will be of particular interest to neuroscientists and cognitive researchers, the book is also accessible to parents and educators.

- * Presents the theory that music exercises higher brain function and can enhance math comprehension
- * Details how music training coupled with spatial-temporal reasoning (thinking in pictures) can dramatically impact a child's ability to understand and master math
- * Includes an interactive CD-ROM with math games
