Acarology: Proceedings of the 10th International Congress (CSIRO entomology) Bruce Halliday

Acarology: Proceedings of the 10th International Congress is a timely overview of the current international research mites and ticks. The outcome of a conference of leading acarologists, it presents major reviews of all current areas of research including:

- *advances in acarine biodiversity and systematics
- *human and livestock diseases transmitted by ticks and other parasitic mites
- *interactions between mites and their food plants
- *mites as biological control agents
- *use of genetic markers in mite population studies
- *mites as bioindicators
- *ecology and biology of soil mites
- *mite evolutionary ecology and reproduction
- *advances in acarine diversity and systematics

The 90 papers in the book represent some of the best research from leading international researchers from over 50 countries, and helps to establish priorities for future research. All papers have been peer reviewed and edited.

Acarology is a comprehensive and important addition to the world literature on mites, and is an essential addition to all acarological and entomological reference collections.
