Bringing the analysis of Brazil's economic performance up to date, Baer's classic text remains the only book in English to provide a thorough historical, statistical, and institutional description of the Brazilian economy. After touching on such issues as Brazil's exporting economy prior to the 1930s, the impact of external shocks, and the historical struggle to bring inflation under control, the book turns to contemporary issues. The changing nature of Brazil's international trading and investment links, the past role of state enterprises and the process of privatization, the agricultural sector, environmental issues, and the economics of the health delivery system are thoroughly examined.

Offering a full statistical and institutional description of Brazil's economy, this book includes a review of the major controversies surrounding such issues as the high degree of concentration in the country's income distribution, the causes of inflation, the impact of various stabilization programs, and the influences of the state in the economy. Scholars, students, international institutions dealing with development, and corporate officers dealing with Latin America will welcome this up-to-date, definitive book on one of the world's largest economies.
