Introduction to Marine Engineering (Marine Engineering Series) D. A. Taylor

Introduction to Marine Engineering discusses machineries and related equipment in ships.

The book first gives an introduction to the kinds of ships and their machineries. The manuscript also discusses diesel engines. Gas exchange process; power measurement; compositions of two-stroke and four-stroke cycle diesel engines; starting air system; turning gear; and common marine diesel engines are described. The text also highlights steam turbines and boilers. Turbine construction, gearing, boiler arrangements, boiler operation, and coal-fired boilers are discussed. The book also looks at feed systems, pumps and pumping systems, fuel and lubricating oils and their treatment, air conditioning, ventilation, and refrigeration.

The text also describes deck machinery and hull equipment. Hydraulic systems, electrical operation, anchor and cargo handling equipment, hatch covers, bow thruster, and safety equipment are considered. The book also discusses shafting and propellers, steering gear, firefighting equipment and strategy, and safe working practices. The text further looks at electrical equipment in ships. Alternating current motors and generators, direct current generators, navigation lights, batteries, and emergency generator supply are discussed.

The book is a vital source of information for those interested in marine engineering.

From reader reviews:

Saul Robinson:

With other case, little individuals like to read book Introduction to Marine Engineering (Marine Engineering Series). You can choose the best book if you'd prefer reading a book. Provided that we know about how is important any book Introduction to Marine Engineering (Marine Engineering Series). You can add understanding and of course you can around the world by a book. Absolutely right, because from book you can understand everything! From your country until foreign or abroad you can be known. About simple point until wonderful thing you are able to know that. In this era, you can open a book as well as searching by internet device. It is called e-book. You need to use it when you feel uninterested to go to the library. Let's examine.

Lorenzo Logan:

What do you in relation to book? It is not important along with you? Or just adding material when you require something to explain what the ones you have problem? How about your time? Or are you busy individual? If you don't have spare time to complete others business, it is gives you the sense of being bored faster. And you have free time? What did you do? Every individual has many questions above. They must answer that question mainly because just their can do this. It said that about book. Book is familiar on every person. Yes, it is correct. Because start from on pre-school until university need this particular Introduction to Marine Engineering (Marine Engineering Series) to read.

Holly Hughes:

Reading a reserve tends to be new life style in this era globalization. With examining you can get a lot of information that can give you benefit in your life. Along with book everyone in this world may share their idea. Books can also inspire a lot of people. A lot of author can inspire their very own reader with their story as well as their experience. Not only the story that share in the ebooks. But also they write about the information about something that you need example. How to get the good score toefl, or how to teach your kids, there are many kinds of book that exist now. The authors these days always try to improve their talent in writing, they also doing some investigation before they write with their book. One of them is this Introduction to Marine Engineering (Marine Engineering Series).

Donald Foster:

As a student exactly feel bored in order to reading. If their teacher expected them to go to the library or even make summary for some book, they are complained. Just very little students that has reading's internal or real their pastime. They just do what the professor want, like asked to the library. They go to generally there but nothing reading really. Any students feel that looking at is not important, boring and also can't see colorful photographs on there. Yeah, it is to get complicated. Book is very important in your case. As we know that on this era, many ways to get whatever we really wish for. Likewise word says, many ways to reach

Chinese's country. Therefore , this Introduction to Marine Engineering (Marine Engineering Series) can make you sense more interested to read.
