Conflict of Interest and Medical Innovation: Ensuring Integrity While Facilitating Innovation in Medical Research: Workshop Summary Sarah H. Beachy, Adam C. Berger, Steve Olson, Roundtable on Translating Genomic-Based Research for Health, Board on Health Sciences Policy, Institute of Medicine

Scientific advances such as the sequencing of the human genome have created great promise for improving human health by providing a greater understanding of disease biology and enabling the development of new drugs, diagnostics, and preventive services. However, the translation of research advances into clinical applications has so far been slower than anticipated. This is due in part to the complexity of the underlying biology as well as the cost and time it takes to develop a product. Pharmaceutical companies are adapting their business models to this new reality for product development by placing increasing emphasis on leveraging alliances, joint development efforts, early-phase research partnerships, and public-private partnerships. These collaborative efforts make it possible to identify new drug targets, enhance the understanding of the underlying basis of disease, discover novel indications for the use of already approved products, and develop biomarkers for disease outcomes or directed drug use. While the potential benefits of collaboration are significant, the fact that the relationships among development partners are often financial means that it is vital to ensure trust by identifying, disclosing, and managing any potential sources of conflict that could create bias in the research being performed together.

Conflict of Interest and Medical Innovation is the summary of a workshop convened by the Institute of Medicine Roundtable on Translating Genomic-Based Research for Health in June 2013 to explore the appropriate balance between identifying and managing conflicts of interest and advancing medical innovation. A wide range of stakeholders, including government officials, pharmaceutical company representatives, academic administrators and researchers, health care providers, medical ethicists, patient advocates, and consumers, were invited to present their perspectives and participate in discussions during the workshop. This report focuses on current conflict of interest policies and their effect on medical innovation in an effort to identify best practices and potential solutions for facilitating innovation while still ensuring scientific integrity and public trust.

From reader reviews:

Patricia Whitmore:

The experience that you get from Conflict of Interest and Medical Innovation: Ensuring Integrity While Facilitating Innovation in Medical Research: Workshop Summary is a more deep you rooting the information that hide inside the words the more you get enthusiastic about reading it. It doesn't mean that this book is hard to recognise but Conflict of Interest and Medical Innovation: Ensuring Integrity While Facilitating Innovation in Medical Research: Workshop Summary giving you enjoyment feeling of reading. The article author conveys their point in particular way that can be understood through anyone who read this because the author of this publication is well-known enough. That book also makes your vocabulary increase well. So it is easy to understand then can go to you, both in printed or e-book style are available. We highly recommend you for having this Conflict of Interest and Medical Innovation: Ensuring Integrity While Facilitating Innovation in Medical Research: Workshop Summary instantly.

Ronald Smith:

Hey guys, do you wishes to finds a new book you just read? May be the book with the headline Conflict of Interest and Medical Innovation: Ensuring Integrity While Facilitating Innovation in Medical Research: Workshop Summary suitable to you? Typically the book was written by popular writer in this era. The book untitled Conflict of Interest and Medical Innovation: Ensuring Integrity While Facilitating Innovation in Medical Research: Workshop Summary is the main one of several books that will everyone read now. This specific book was inspired a lot of people in the world. When you read this reserve you will enter the new shape that you ever know previous to. The author explained their strategy in the simple way, so all of people can easily to know the core of this e-book. This book will give you a great deal of information about this world now. To help you see the represented of the world in this book.

Johnnie Colby:

A lot of book has printed but it takes a different approach. You can get it by internet on social media. You can choose the most effective book for you, science, comedian, novel, or whatever through searching from it. It is called of book Conflict of Interest and Medical Innovation: Ensuring Integrity While Facilitating Innovation in Medical Research: Workshop Summary. You can contribute your knowledge by it. Without departing the printed book, it could possibly add your knowledge and make you actually happier to read. It is most crucial that, you must aware about reserve. It can bring you from one destination for a other place.

Cara Shaver:

Reading a publication make you to get more knowledge from it. You can take knowledge and information from your book. Book is written or printed or highlighted from each source which filled update of news. In

this particular modern era like at this point, many ways to get information are available for an individual. From media social like newspaper, magazines, science publication, encyclopedia, reference book, book and comic. You can add your knowledge by that book. Are you ready to spend your spare time to open your book? Or just searching for the Conflict of Interest and Medical Innovation: Ensuring Integrity While Facilitating Innovation in Medical Research: Workshop Summary when you required it?
