Morphology of the Primates and Human Evolution R.P. Srivastava

The emergence of Homo erectus from one of the australopithecines, their cultural attainments, and their gradual transitions into a modern man has long been a subject of interest for the researchers. This book presents a detailed account of the morphological features of the primates. In the process it also provides the story of human evolution. The text focuses on the Miocene hominoids and their role in the subsequent development of the hominoids.

Intended for the undergraduate and postgraduate students of Anthropology and Archeology, the book will be beneficial for the students appearing in the competitive examinations.
