On Sunspots

Galileo Galilei, Christoph Scheiner

On Sunspots Galileo Galilei, Christoph Scheiner

Galileo's telescopic discoveries, and especially his observation of sunspots, caused great debate in an age when the heavens were thought to be perfect and unchanging. Christoph Scheiner, a Jesuit mathematician, argued that sunspots were planets or moons crossing in front of the Sun. Galileo, on the other hand, countered that the spots were on or near the surface of the Sun itself, and he supported his position with a series of meticulous observations and mathematical demonstrations that eventually convinced even his rival.

On Sunspots collects the correspondence that constituted the public debate, including the first English translation of Scheiner's two tracts as well as Galileo's three letters, which have previously appeared only in abridged form. In addition, Albert Van Helden and Eileen Reeves have supplemented the correspondence with lengthy introductions, extensive notes, and a bibliography. The result will become the standard work on the subject, essential for students and historians of astronomy, the telescope, and early modern Catholicism.

From reader reviews:

Tara Wilson:

Here thing why this particular On Sunspots are different and reliable to be yours. First of all reading a book is good however it depends in the content than it which is the content is as scrumptious as food or not. On Sunspots giving you information deeper as different ways, you can find any publication out there but there is no reserve that similar with On Sunspots. It gives you thrill reading through journey, its open up your personal eyes about the thing which happened in the world which is perhaps can be happened around you. You can bring everywhere like in recreation area, café, or even in your means home by train. If you are having difficulties in bringing the published book maybe the form of On Sunspots in e-book can be your alternative.

Sherry Spears:

Reading a reserve tends to be new life style in this particular era globalization. With looking at you can get a lot of information that can give you benefit in your life. Along with book everyone in this world could share their idea. Guides can also inspire a lot of people. Lots of author can inspire their very own reader with their story or their experience. Not only the storyplot that share in the publications. But also they write about the ability about something that you need instance. How to get the good score toefl, or how to teach children, there are many kinds of book that you can get now. The authors these days always try to improve their talent in writing, they also doing some analysis before they write to their book. One of them is this On Sunspots.

Nathaniel Mitchell:

Is it you who having spare time and then spend it whole day by watching television programs or just lying on the bed? Do you need something new? This On Sunspots can be the answer, oh how comes? The new book you know. You are thus out of date, spending your extra time by reading in this fresh era is common not a nerd activity. So what these books have than the others?

Timothy Wingo:

Reading a guide make you to get more knowledge from the jawhorse. You can take knowledge and information coming from a book. Book is prepared or printed or created from each source in which filled update of news. On this modern era like now, many ways to get information are available for anyone. From media social including newspaper, magazines, science guide, encyclopedia, reference book, fresh and comic. You can add your understanding by that book. Ready to spend your spare time to open your book? Or just in search of the On Sunspots when you desired it?
