Study Week on a Modern Approach to the Protection of the Environment (Pontifical Academy of Sciences, 75)

Study Week on a Modern Approach to the Protection of the Environment (Pontifical Academy of Sciences, 75)

These Proceedings consider all aspects of the environmental problems facing the world today - scientific, social, economic, philosophical and historical. Many of the discussions which followed paper presentations are included in the text. Along with scientific discussions of solutions to particular problems, the book argues for a new approach to thought and action in the use of natural resources. If a constructive global strategy towards the protection of the environment is to be socially compatible and economically sound, then it must be developed through an interdisciplinary approach which will avoid the impractical solutions which might be suggested by theoretical or unilateral considerations. Ecological, economic, social and cultural research must be accompanied by the development of a new mentality of respect for the environment which will inculcate a reasonable and moderate use of natural resources.
