Formulas Useful for Linear Regression Analysis and Related Matrix Theory: It's Only Formulas But We Like Them (SpringerBriefs in Statistics) Simo Puntanen, George P. H. Styan, Jarkko Isotalo

?This is an unusual book because it contains a great deal of formulas. Hence it is a blend of monograph, textbook, and handbook. It is intended for students and researchers who need quick access to useful formulas appearing in the linear regression model and related matrix theory. This is not a regular textbook - this is supporting material for courses given in linear statistical models. Such courses are extremely common at universities with quantitative statistical analysis programs.
