Making Progress in Primary Science: A Study Book for Teachers and Student Teachers Wynne Harlen, Christine Macro, Kathleen Reed, Mike Schilling

This new and extensively revised edition of *Progress in Primary Science* is intended for all those involved in training teachers of primary school science, both preservice and on INSET courses. Its flexible modular structure enables course leaders to tailor their course to participants' needs. Each module can be studied individually or as part of an extended programme and contains notes for facilitators, photocopiable workshop materials, activities for practitioners and suggestions for further reading.

Throughout the book the focus is on the learning of science as an investigative process through which pupils develop an understanding of ideas. This is supported by modules on different aspects of teaching and learning in science, including:

- building on children's own ideas
- how to ask and answer questions
- managing practical work in the classroom
- science for very young children
- effective assessment, self-assessment and feedback
- cross-curricular links
- ICT and science
- science outside the classroom.

The companion study book currently available can be used by those participating on these courses. It follows the same modular structure and contains the same information as this book, and makes planning and delivering the course easier and less time consuming for the course leader.

From reader reviews:

Irene Gwyn:

As people who live in the particular modest era should be revise about what going on or data even knowledge to make all of them keep up with the era that is always change and move forward. Some of you maybe will update themselves by examining books. It is a good choice in your case but the problems coming to anyone is you don't know what one you should start with. This Making Progress in Primary Science: A Study Book for Teachers and Student Teachers is our recommendation to help you keep up with the world. Why, since this book serves what you want and want in this era.

Jeffrey Bumgardner:

Information is provisions for individuals to get better life, information today can get by anyone at everywhere. The information can be a know-how or any news even restricted. What people must be consider while those information which is within the former life are hard to be find than now is taking seriously which one would work to believe or which one the resource are convinced. If you get the unstable resource then you obtain it as your main information there will be huge disadvantage for you. All of those possibilities will not happen in you if you take Making Progress in Primary Science: A Study Book for Teachers and Student Teachers as the daily resource information.

Carl Johnson:

Playing with family within a park, coming to see the marine world or hanging out with pals is thing that usually you have done when you have spare time, after that why you don't try point that really opposite from that. Just one activity that make you not sense tired but still relaxing, trilling like on roller coaster you are ride on and with addition of information. Even you love Making Progress in Primary Science: A Study Book for Teachers and Student Teachers, you are able to enjoy both. It is very good combination right, you still need to miss it? What kind of hangout type is it? Oh occur its mind hangout men. What? Still don't obtain it, oh come on its identified as reading friends.

Pamela Stanley:

Book is one of source of expertise. We can add our information from it. Not only for students but also native or citizen require book to know the update information of year for you to year. As we know those ebooks have many advantages. Beside many of us add our knowledge, also can bring us to around the world.
